INT version imtoken wallet usage guide

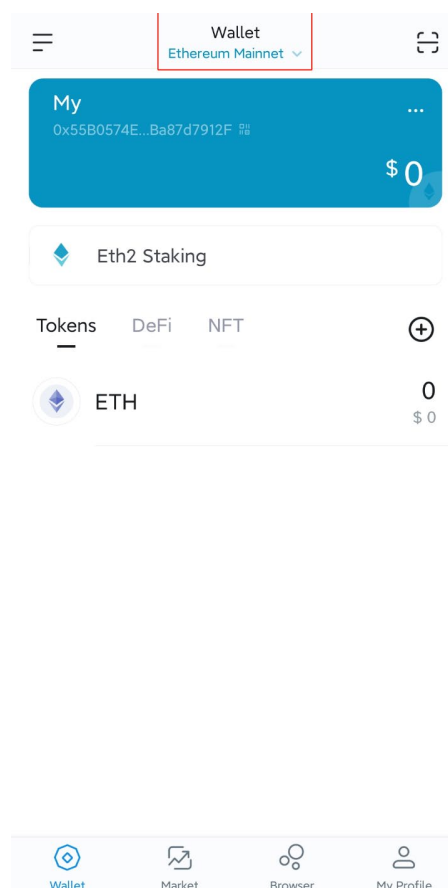

Imtoken wallet, a senior mobile multi-chain wallet, supports custom networks, and is widely used in the mobile terminal to access various public chain Defi and NFT DAPP applications.

Download imtoken wallet:

<https://token.im/download> (please update to V2 or later)

How to add INT 4.0 network in imtoken wallet:

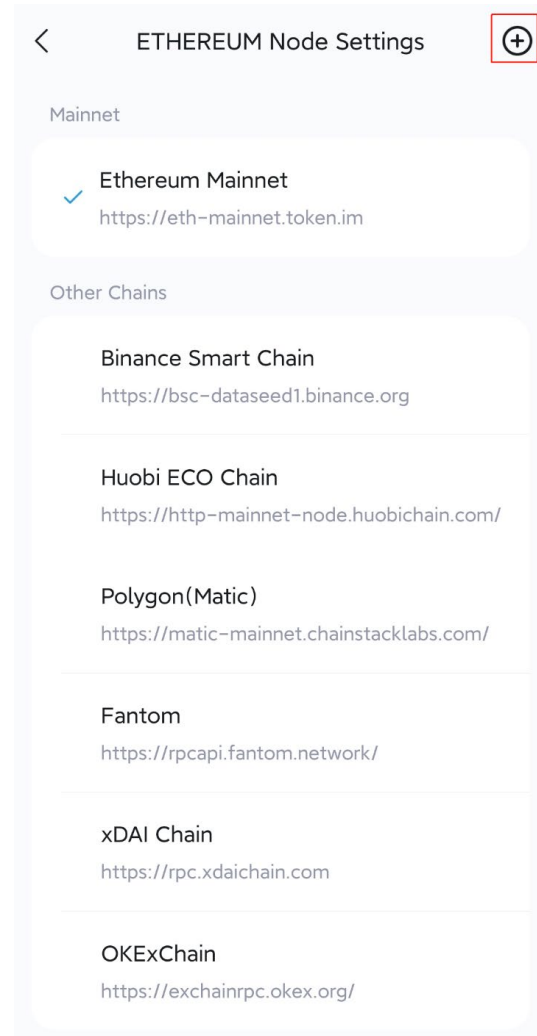

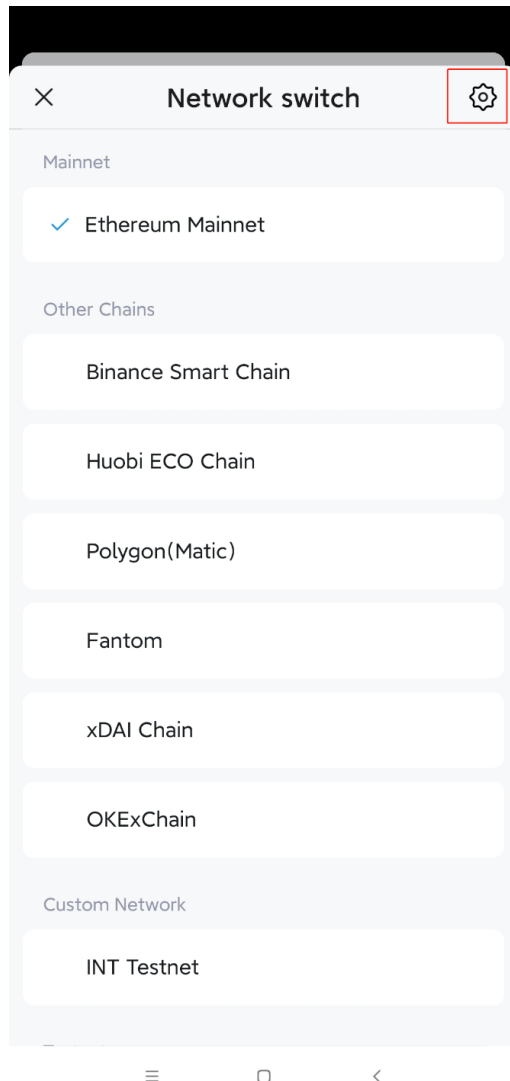

1. Open imToken and click the node switch button

Make a different world

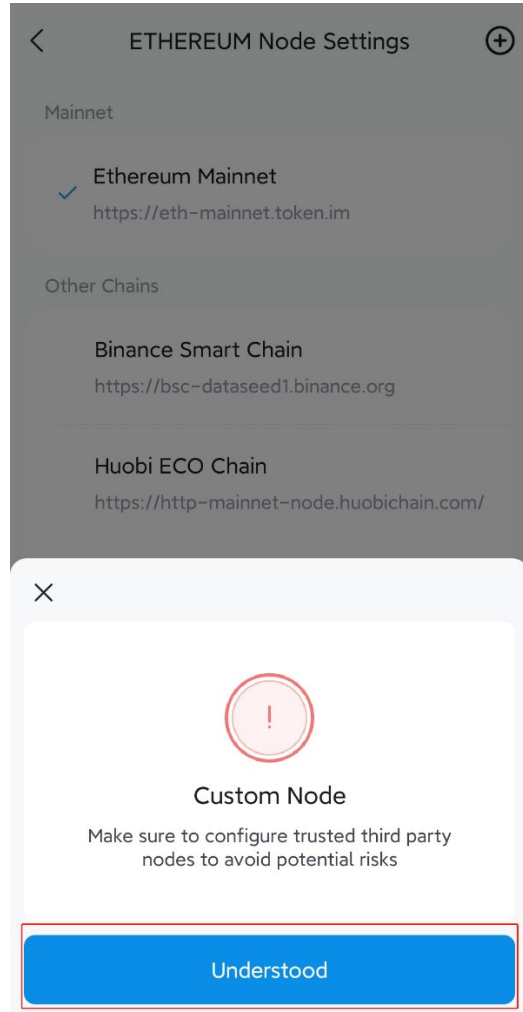

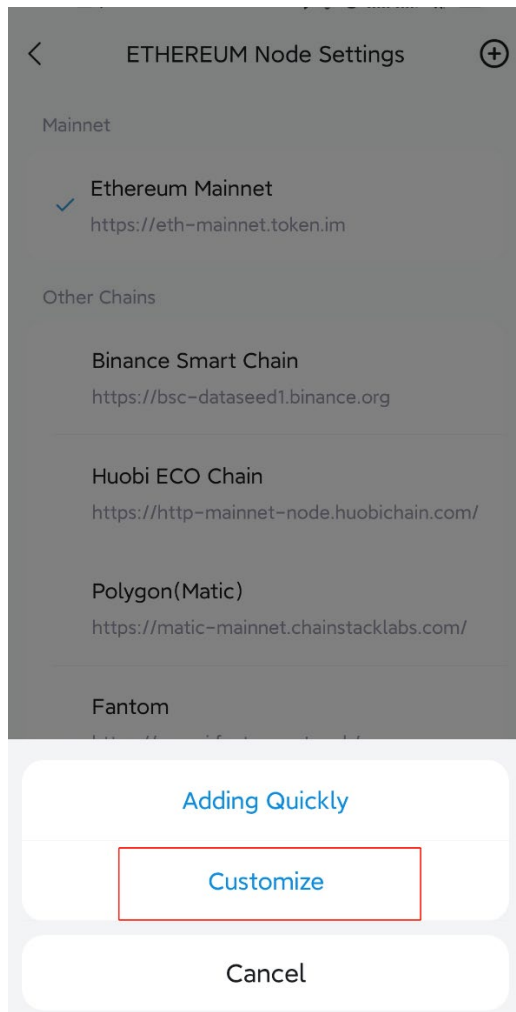

2. Enter the node setting page

Make a different world

2. Click "Customize" to jump to the custom node setting page.

Make a different world

3. Fill in the following aspects and click "Save" in the upper right corner after completing.

Network Name: INT 4.0

RPC URL: <https://titansrpc.intchain.io>

Chain ID: 1024

Symbol: INT

Block Explorer URL: <https://titansexplorer.intchain.io>

< Custom Node Save

Network Name

INT 4.0

RPC URL

<https://titansrpc.intchain.io>

Chain ID

1024

Symbol

INT

Block Explorer URL

<https://titansexplorer.intchain.io>

Some services may be unavailable due to custom node services

Back to homepage and switch the network to INT4.0, then you can enjoy the Dapp in INTChain.
