

INT version MetaMask user guide

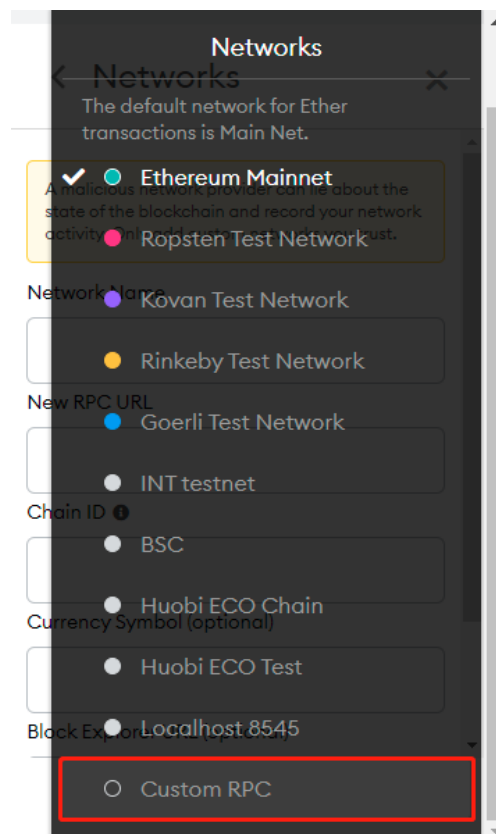

MetaMask was created out of the needs of creating more secure and usable Ethereum-based web sites. In particular, it handles account management and connecting the user to the blockchain. It's supported in Chrome, Brave, and Safari browsers.

Download MetaMask:

<https://metamask.io/download.html>

How to Custom RPC:

1. Go to setting page and add a new network-Custom RPC

Make a different world

2. Fill in the following aspects and click "Save" after completing.

Network Name: INT 4.0

New RPC URL: <https://titansrpc.intchain.io>

Chain ID: 2047

Currency Symbol: INT

Block Explorer URL: <https://titansexplorer.intchain.io>

The screenshot shows a mobile application interface for adding a new network. At the top, there's a header with a fox icon, a dropdown menu set to 'Ethereum Mainnet', and a circular icon. Below this is a title bar with a back arrow, the word 'Networks', and a close 'X' button. The main area contains five input fields with labels: 'Network Name' (value: INT 4.0), 'New RPC URL' (value: https://titansrpc.intchain.io), 'Chain ID' with an info icon (value: 2047), 'Currency Symbol (optional)' (value: INT), and 'Block Explorer URL (optional)' (value: https://titansexplorer.intchain.io/). At the bottom are two buttons: 'Cancel' and 'Save'.

3. Back to homepage and switch the network to INT4.0, then you can enjoy the Dapp in INTChain.
